UCLA CODING & SOFTWARE ENGINEERING BOOTCAMP SEPT. 2021-FEB. 2022

Full Stack Development Course
- » *Technical Skills:* HTML, CSS, JavaScript, JQuery, Node, Bootstrap, Postman.

Projects
- » *Musician Database:* An app allowing users to search musicians or bands by name to see a list of their upcoming shows. The app runs through various APIs to give the user detailed information about the event, venue and musician or band. Built using HTML, CSS, JavaScript, Bootstrap, Postman.
- » *Weather App:* A weather app was built so that the user can simply type in the name of a city in the search bar and pull information from the Open Weather public API. After clicking search, the current weather for the imputed city will show up, as well as a 5 day forecast. The information showcased includes name of city, temp, humidity, UVI and wind speed. Built using HTML, CSS, JavaScript.
- » *Day Tracker:* A day planner that allows the user to schedule and save appointments, meetings, etc. for a standard work day, 9 AM to 5 PM. As the day progresses, the rows change color depending on if it's past, present or future hours. The save button allows you to save the data, and will stay there upon reload. I also added a reset button that when pressed, clears all data and allows the user to start from new.
